#### SECTION 1 IMPORTANT INFORMATION

This report generated by Plant Assessor™ © Online Safety Systems on Tuesday, 3 Jun 2025 7:45 AM

This report pertains to this item of plant as it appeared on the day of inspection.

It is the responsibility of the hirer to conform with the instructions and information contained within this report. Any change in condition of this item of plant should be reported to the hire company immediately.

Any information relating to the standard features have been supplied via the manufacturer and should be used as a guide only until verified.

For further information regarding this report contact Online Safety Systems on 1300 72 88 52

### SECTION 4 RISK TREATMENTS REQUIRED

This section of the report pertains to hazards created by use of this item of plant which currently do not have risk treatments in place. The risk treatments recommended in this section have been developed based on relevant Australian Standards, health & safety legislation, the hierarchy of risk treatment in accordance with the guidelines set forth in AS/NZS ISO 31000 – Risk Management and various other sources. The recommended risk treatment measures must be developed, implemented and validated as effective prior to the operation, maintenance or testing of this item of plant. Treatments applied must be dated and initialled adjacent the recommendations. All operators must read and understand the entire contents of this section prior to operating this item of plant.

|           | HAZARD(S)  | Prelim. Risk<br>Rating | Residual Risk<br>Rating | Time<br>Frame | Due Date | Date<br>Rectified | Initial |
|-----------|--|------------------------|-------------------------|---------------|----------|-------------------|---------|
| OPERATION | NOMINATED<br>OPERATOR<br>ONLY  | CRITICAL 24            | MEDIUM 15               | Immediate     | 3-Jun-25 |                   |         |
|           | Risk Treatment Required: Operator Competency<br>Only persons who are qualified, trained and experienced and/or hold the relevant certification/license can operate this item of plant. If there is not a<br>competent/licensed person available for operation of this item of plant then only persons who are supervised by a competent/licensed person can<br>operate this item of plant. |                        |                         |               |          |                   |         |

#### **SECTION 5** RISK TREATMENTS IN PLACE

This section of the report pertains to risk treatments currently in place on this item of plant. This section must be read in conjunction with the safety section of the manufacturers handbook. All operators must read and understand the entire contents of this section prior to operating this item of plant. These treatments or equivalent must remain in place at all times whilst this item of plant is in operation.

|          | HAZARD(S)  | Prelim. Risk Rating              | Residual Risk Rating         |  |  |  |  |
|----------|--|----------------------------------|------------------------------|--|--|--|--|
| DELIVERY | CRUSHING   | HIGH 22                          | MEDIUM 15                    |  |  |  |  |
