

## 4 Transport

### ▲ WARNING Hoist tipping over / hydraulic attachment falling

The hydraulic attachment is heavy. The hoist/lifting equipment and/or hydraulic attachment tipping over or falling may cause serious injury and material damage.

- ▶ Only transport the hydraulic attachment with lifting equipment with the right load-bearing capacity for the weight of the hydraulic attachment.
- ▶ Only lift and secure the hydraulic attachment with lifting gear (ropes, chains, shackles etc.) with the right load-bearing capacity for the weight to be lifted.
- ▶ Make sure that there is nobody near or under the suspended hydraulic attachment.

### ▲ WARNING Percussion unit falling

The percussion unit slides out of the breaker box if not secured by the adapter plate or the transport safety device. The falling percussion unit may cause serious injury and material damage.

- ▶ Never transport a hydraulic breaker without mounted adapter plate or transport safety device.
- ▶ Immediately mount the transport safety device after removal of the adapter plate.
- ▶ The percussion unit must not move in the breaker box even if the transport safety device is mounted. A sliding percussion unit can destroy the transport safety device.
- ▶ Replace a missing elastic pad, if necessary e.g. with a wooden block. This keeps the percussion unit fixed in the breaker box during transport.
- ▶ Immediately replace a defective transport safety device. Use the spare parts list to order a new transport safety device. If not in use save the transport safety device for future use.

### ▲ WARNING Hydraulic breaker falling

The lifting eye may fail and cause the hydraulic breaker to fall. This may cause serious injury and material damage.

- ▶ Check the lifting eye before you lift the hydraulic breaker. Never lift the hydraulic breaker with the lifting eye if:
  - the checkpoints (A) are worn and not protruding anymore
  - or
  - the checkpoints (B) are worn and not recessed anymore.

- the material is worn up to the checkpoints (A, B).

Use permitted

Use prohibited

- the lifting eye is bent.
  - you detect cracks in the lifting eye or the weld seam.
- ▶ Contact the Epiroc Customer Center / Dealer in your area if the lifting eye is worn in any way.

## 4.1 Transport using a crane

- Secure the hydraulic attachment with ropes or chains as shown in the following illustration.

- Slowly lift the hydraulic attachment.
- Place the hydraulic attachment on timber support blocks.
