# Ideagen? RISK MANAGEMENT REPORT

TYPE	Percussion Hammer - Attachment
MAKE	Toku
MODEL	TNB-400
SERIAL NUMBER	11107
PLANT NUMBER	40B
Report Number	AHH 20250312-1228
Date	12-Mar-2025
Created By	AHSH Service
Assessor	Mitchell Pennells
Assist. Assessor(s)	Amanda Fotheringham
Completed By	AHSH Service
Owner	Australian Hammer Supplies Hire Pty Ltd
Assessment Purpose	Hire
State	NSW

# HAMMERHRE

### **TABLE OF CONTENTS**

<b>SECTION 1</b>	<b>IMPORTANT INFORMATION</b> Contains information outlining the scope and any limitations applicable to this Risk Management Report
<b>SECTION 2</b>	MACHINE DETAILS Contains standard machine specifications and details of any extras fitted
SECTION 3	<b>RISK ANALYSIS, RISK EVALUATION &amp; RISK TREATMENT</b> Contains details of the technique used to calculate risk ratings, time frame and risk treatments. Please refer to this information when reviewing and interpreting the information in section 4 & 5
<b>SECTION 4</b>	<b>RISK TREATMENTS REQUIRED</b> Contains detailed information regarding the risk treatments to be implemented including hazard, risk rating, time frame, relevant standards & legislative references
SECTION 5	<b>RISK TREATMENTS IN PLACE</b> Contains detailed information regarding the risk treatments in place including hazard, risk rating, relevant standards & legislative references
SECTION 6	IMAGES AND NOTES Contains images & any relevant information entered by the assessor

Serial Number Assessed By Date

11107 AHSH Service 12-Mar-2025

#### SECTION 1 IMPORTANT INFORMATION

This report generated by Plant Assessor™ © Online Safety Systems on Wednesday, 12 Mar 2025 12:30 PM

This report pertains to this item of plant as it appeared on the day of inspection.

It is the responsibility of the hirer to conform with the instructions and information contained within this report. Any change in condition of this item of plant should be reported to the hire company immediately.

Any information relating to the standard features have been supplied via the manufacturer and should be used as a guide only until verified.

For further information regarding this report contact Online Safety Systems on 1300 72 88 52

#### **SECTION 2** MACHINE DETAILS

	- NOISE TEST RESULTS	1. Manufacturers specified noise level dBA	
S S	- NOISE TEST RESULTS	Sound Level @ 85dB(A) distance from attachment (m)	
		Carrier Weight max (T)	45 - 70
₽		Length (mm)	
	DIMENSIONS/WEIGHTS	Operating weight (kg)	4514
		Working Length of the Tool (mm)	
۳		Working Tool Diameter (mm)	
	HYDRAULICS	Required Oil Flow (I/min)	280-390
동	HIDRAULICS	Required Oil Pressure (kPa)	14000-17000
Ā	WORK CAPABILITIES	Impact Rate (bpm)	370 - 470
ÌÈI			

#### SECTION 3 RISK ANALYSIS / RISK EVALUATION

RI	RISK ANALYSIS							
		1. INSIGNIFICANT Dealt with by in house first aid	2. MINOR Treated by medical professionals, hospital out patients	3. MODERATE Significant non permanent injury overnight hospital stay	4. MAJOR Extensive permanent injury eg. Loss of fingers, extended hospital stay	5. CATASTROPHIC Death, permanent disabling injury eg. Loss of hand, quadriplegia		
LIKELIHOOD	A. Almost certain to occur in most circumstances	MEDIUM 8	HIGH 16	HIGH 18	CRITICAL 23	CRITICAL 25		
Ļ	B. Likely to occur frequently	MEDIUM 7	MEDIUM 10	HIGH 17	HIGH 20	CRITICAL 24		
	C. Possibly and likely to occur at sometime	LOW 3	MEDIUM 9	MEDIUM 12	HIGH 19	HIGH 22		
	D. Unlikely to occur but could happen	LOW 2	LOW 5	MEDIUM 11	MEDIUM 14	HIGH 21		
	E. May occur but only in rare circumstances	LOW 1	LOW 4	LOW 6	MEDIUM 13	MEDIUM 15		

NUTION	CRITICAL	Act immediately to mitigate risk. Implement risk treatment(s) in accordance with the risk treatment table below.
		Act immediately to mitigate risk. Implement risk treatment(s) in accordance with the risk treatment table below. If the appropriate risk treatments are not immediately accessible establish interim risk treatment strategies. Permanent risk treatments must be implemented within one week.
	MEDIUM	Take reasonable steps to mitigate and monitor the risk. Implement risk treatment(s) in accordance with the risk treatment table below. Permanent risk treatments must be implemented within one month.
	LOW	Take reasonable steps to mitigate and monitor the risk. Implement risk treatment(s) in accordance with the risk treatments must be implemented within three months.

**RISK TREATMENT** 

TREATMENT		Selecting the most appropriate risk treatment option involves balancing the costs and efforts of implementation against the benefits derived, with regard to legal, regulatory and other requirements. (source AS/NZS ISO 31000:2018)				
REAT	Eliminate	Eliminate the risk source.				
<b>RISK T</b>	Substitute	Provide an alternative that is capable of performing the same task which is safer.				
Ľ	Isolate	Isolate people from the hazard.				
Engineering Provide or construct a physical barrier or gu		Provide or construct a physical barrier or guard.				
	Administration	Develop policies, procedures, practices and guidelines in consultation with employees to mitigate the risk. Provide training, instruction and supervision about the risk source.				
	Personal protective	Provide personal protective equipment to protect the individual from the risk source.				

#### SECTION 4 RISK TREATMENTS REQUIRED

This section of the report pertains to hazards created by use of this item of plant which currently do not have risk treatments in place. The risk treatments recommended in this section have been developed based on relevant Australian Standards, health & safety legislation, the hierarchy of risk treatment in accordance with the guidelines set forth in AS/NZS ISO 31000 – Risk Management and various other sources. The recommended risk treatment measures must be developed, implemented and validated as effective prior to the operation, maintenance or testing of this item of plant. Treatments applied must be dated and initialled adjacent the recommendations. All operators must read and understand the entire contents of this section prior to operating this item of plant.

Procession       HIGH 22       MEDIUM 12       1 Week       19-Mar-25         Risk Treatment Required: Carrier Unit Risk Assessment A plant risk assessment must be available for the carrier unit used with this attachment.       I Week       19-Mar-25         The risk assessment should be conducted at regular intervals on all plant, and the details available to the operator of the unit. ### SECTION 5 RISK TREATMENTS IN PLACE

This section of the report pertains to risk treatments currently in place on this item of plant. This section must be read in conjunction with the safety section of the manufacturers handbook. All operators must read and understand the entire contents of this section prior to operating this item of plant. These treatments or equivalent must remain in place at all times whilst this item of plant is in operation.

	HAZARD(S)	Prelim. Risk Rating	Residual Risk Rating

0	BURNS	MEDIUM 9	LOW 4		
Risk Treatments in Place: Hand Protection Label The hazard warning labels re: wearing hand protection attached to this item of plant refer to the potential for burns due to extreme heat of the work tools and worked material immediately after work which can cause serious injury. Serious injury may result if hand protection is not worn. These labels must be present, clear and legible at all times. References: AS/NZS4024.1201, AS1319-					
s s	STRIKING, BURNS	HIGH 22	MEDIUM 15		
Risk Treatments in Place: Hydraulic Hoses This item of plant has hydraulic hoses. These hoses must be inspected each day or before each use for wear and tear. If there are visible sig wear, immediate action must be taken to control the risk arising from this wear. These inspections must be documented. Hydraulic fluid at high pressure can penetrate the skin, never use any part of your body to check for leaks. If oil penetrates the skin seek med advice immediately. Always use a piece of cardboard or similar to check for suspected leaks. Always wear appropriate gloves when handling hydraulic hoses.					
	ure can be stored and is a hazard. Always connect and disconnect hydraulic AS4024, AS2671	hoses as per the manufactur	er's manual.
